Your Behavioural Blueprint

Level 7 · Behaviour, Integration, and Habits

Name _____ Date _____

Most of us know what we should do. The difficulty is doing it consistently, especially under pressure, when old patterns take over. Those old patterns are not random. Each one meets a need, such as certainty, connection, or significance, which you explored in Level 3. Change lasts when the new behaviour meets the same need in a healthier way.

You do not break an old pattern. You replace it with one that serves you better.

PART 1 The Behaviour

Choose one behaviour you are building, and name the pattern it replaces.

The new behaviour you are building

Choose from your Developing Positive Behaviours work. Be specific.

The old pattern it replaces

What do you tend to do instead, especially under pressure?

PART 2 Trigger and Need

Understanding why the old pattern happens makes the new one easier to choose.

The trigger you now recognise

The situation, feeling, or thought that sets the old pattern off.

The need the old pattern was meeting

Certainty, variety, significance, connection, growth, or contribution.

How the new behaviour meets that same need

This is the key to making it last.

PART 3 Your Plan

Make the new behaviour easy to start and easy to return to.

When and where it will happen

Link it to something you already do. For example: "After my morning coffee, I will..."

The smallest version

On a difficult day, what is the two-minute version?

What you will do when you slip

Slips are part of change. Decide how you will recover, not restart.

Who or what supports you

YOUR BLUEPRINT IN ONE SENTENCE

When …

You do not break an old pattern. You replace it with one that serves you better.
